Homeowner's Responsibilities

1. We have large vehicles with a lot of equipment that we need access to. Please make sure the driveway is clear and your vehicles are out of the way.
 2. We need access to a power source in order to hook up the lights. Please make sure there is a working outlet available.
 3. We will be working on ladders climbing up and down onto your roof. Please make sure all dog poop is picked up around the yard so no one makes a mess.
 4. Trim all necessary trees and bushes back.
- All of these items need to be completed prior to the crew's arrival on the date of service. If the crew cannot complete the scope of work because these items were not completed, a \$75 service fee will be charged.

Installation Guidelines

- In some cases, hot glue, staples, wiring, zip ties and even screws must be used to ensure efficient installation.
- Timers will be set accordingly by the crews prior to departure. If the timer is adjusted afterwards and is not functioning as expected, a service fee will be charged.
- Outlets and circuits can only handle so much amperage. Plugging items into the receptacles or timers used by Allbrite Lights voids all warranties provided and an additional rate will be charged to rectify the situation.
